

PROJECT SOLARIS

SUN & LIGHT CONTROL SOLUTIONS

BUSINESS OVERVIEW

An excellent opportunity exists to buy the business and assets of a unique, tried and extensively 3rd Party tested window solar shading, heat and glare reducing system, with bespoke manufacturing plant. The system has been in existence for many years, and the owning business sees major additional opportunities within the Lighting and Façade cladding sector.

The Company manufactures, from 90% recycled materials, high-performance woven metal fabrics for screens for solar shading, glare control, ventilation and daylighting. Its flagship USP product is a metal fabric composed of very fine bronze alloy louvres woven into a fabric that is tensioned on frames and installed externally for glazing and facades as screens, roller, venetian or vertical systems.

The Company emphasises sustainability, durability, and fire-protection passive functionality (i.e., non-motorised, minimal maintenance) in building façade solutions and also dynamic external roller, venetian and vertical systems

OPPORTUNITY OVERVIEW

- Offers a truly unique, worldwide - exclusive product - manufactured on the only machines of their kind in the world.
- Exceptional performance with competitive pricing and strong margins.
- Designed for versatility, the system is easy and inexpensive to install in both new builds and retrofits.
- Backed by extensive third-party and in-house testing, the Company ensures proven quality, durability, and sustainability.
- Every project benefits from in-house precision engineering, environmental responsibility, and complete design freedom.

OPPORTUNITY HIGHLIGHTS

- Growing global demand for energy-efficient and sustainable buildings.
- Compliance with modern building regulations and green standards.
- Alignment with new Green Building Standards and certification requirements, LEED etc.
- Global expansion plans including manufacturing partnerships in the USA and Middle East.
- Opportunities for new machine licensing to scale production internationally.
- E-commerce growth through Rooflight and Velux retrofit, self-fit kits for easy online access.

ASSETS AVAILABLE

- Business Equipment
- Customer Databases
- E-commerce Site
- Brand Related Assets
- Organisational Knowledge
- Fabric Stock
- Factory / Facility

DEADLINE

It is intended that a sale will be executed at the earliest opportunity, and all offers must be registered by no later than **12pm on 28th November 2025**.

FURTHER INFORMATION

Requests for further information should be addressed to David Holborn of Gordon Brothers who are acting as agents. Contact details have been provided.

Access to additional information will be provided on receipt of signed NDA. All offers to be supported by proof of funding.
