

BUSINESS OPPORTUNITY

An excellent opportunity exists to acquire the intellectual property assets of Reskube, a company that offers a smart, scalable solution for power and communication. Reskube is a cost-effective, remotely managed 'infrastructure-in-a-box' that integrates sustainable energy, resilient connectivity, and virtualised network functions—simplifying edge infrastructure, automating operations, and enabling intelligent scaling.

BUSINESS OVERVIEW

Reliable power and connectivity are vital in today's world, especially in disaster-prone or remote areas where infrastructure is fragile or non-existent. Reskube offers a simple, cost-effective solution for deploying power and communications to very remote scenarios. Whether for disaster response teams or remote communities, the easy-to-deploy, remotely managed system ensures continuous power and connectivity when other systems fail.
