

HEARING DIAGNOSTICS LIMITED

BUSINESS OVERVIEW

Gordon Brothers is pleased to present the opportunity to acquire the intellectual property assets of Hearing Diagnostics Limited (in Liquidation), an innovative hearing screening company.

The Company developed a proprietary technology that delivers highly accurate hearing assessments using a unique listening paradigm designed to eliminate bias. This breakthrough solution achieves exceptional sensitivity (99.4%) together with specificity (95%) in users over 50, without requiring audiology training to administer, making it ideal for large-scale screening and diverse healthcare applications.

The Company holds a granted European patent protecting the paradigm and screening framework, and has active applications in the US and UK, relating to enhancements of the technology for paediatric use. This strong intellectual property position provides an excellent foundation for commercial expansion and product development.

Although the Company is not currently manufacturing at scale, it has developed hardware and software in-house and produced prototype units, offering a compelling opportunity for established medical device manufacturers or healthcare providers seeking to enhance their product portfolio or enter the hearing diagnostics market.

OPPORTUNITY HIGHLIGHTS

- **Proprietary Technology:** Innovative hearing screening solution using a unique listening paradigm to eliminate bias and improve accuracy.
- **Exceptional Performance:** Sensitivity and specificity levels that significantly outperform traditional screening methods.
- **Strong IP Position:** Granted European patent with additional applications in the US and UK, including paediatric-focused enhancements.
- **Versatile Applications:** Suitable for healthcare providers, device manufacturers, and sectors requiring safety-critical hearing assessments.

ASSETS AVAILABLE

- **Patent Portfolio:** Granted European patent; pending US and UK applications.
- **Software:** Proprietary Android application developed in-house.
- **Brand-related Assets:** Including website content, domain name and unregistered brand rights.
- **Hardware:** 10 prototype screening units and configured smartphone unit.

DEADLINE

A deadline for offers has been set for **Monday 2nd February 2026 at 12:00pm (GMT).**
