

FC LABORATORIES LIMITED (IN LIQUIDATION)

BUSINESS OVERVIEW

Gordon Brothers has been instructed on the sale of the intellectual property assets of FC Laboratories Limited (in Liquidation), developer of brain fitness tracking technology to improve brain functionality.

FC Labs has developed a platform called BrainFit, which includes a fully developed mobile application that integrates with existing wearable devices and analyses data to provide a brain score to track and improve mental resilience, focus, and recovery. A proprietary wearable neurotech device which utilises fNIRS sensors to deliver highly accurate brain monitoring in real time has also been under development, and the company has produced a number of prototypes to date.

This technology is designed for a broad market, ranging from high-stress professionals and athletes to employers in high-risk sectors seeking to reduce workplace accidents and burnout, with significant revenue potential based on app subscriptions and hardware sales.

This acquisition represents a compelling opportunity for health-tech providers, wearable manufacturers, or corporate wellness entities looking to build upon the traction already achieved by the company.

OPPORTUNITY HIGHLIGHTS

- **Brain Tracking Platform:** A comprehensive ecosystem for real-world brain monitoring that moves beyond simple proxy measures like heart rate.
- **Proprietary CoreScore Algorithm:** Methodology backed by over 3 million data points and clinical neuroscience expertise.
- **Dual-Revenue Stream Model:** A B2C subscription app complemented by a high-margin wearable hardware pipeline.
- **High-Growth Sector Application:** Specialised solutions for high-risk industries (construction, engineering, logistics) designed to monitor safety-critical human factors.

ASSETS AVAILABLE

- Source Code and Backend Infrastructure relating to Brainfit Platform
- Proprietary fNIRS Dataset featuring 3m measurements
